

Don't Burst at the Seams,

Get the Right Fertigation Gear Ready for a

SpringSTART®

Believe it or not, water tanks were NEVER designed to safely store liquid fertilizer. Why? Well liquid fertilizer is heavier than water, placing additional load and strain on joints and tank structures. Rain water tanks can sag, split and burst at the seams leading to loss of valuable product and serious environmental consequences.

The team at SLTEC® have a range of innovative liquid fertilizer tanks, fittings and injection systems to suit your specific requirements. We will even come out to conduct a complementary audit of your requirements**.

SLTEC® Fertigation Products Include:

- Tanks designed to safely store your liquid fertilizer products: 1,500 L, 2,400 L, 5,000 L and 10,000 L
- Larger industrial tank storage options also available
- High quality fittings, movable carts, skid stands and fully bunded options available
- Technical support & advice on injection pump technology
- On farm fertigation audits & assessments available
- Complimented by a wide range of innovative locally made liquid fertilizer products

Brought to you by SLTEC®, the leaders in integrated fertigation solutions.
