At last! A complete fluid nutrient solution with phosphonic acid

Baseline Phos Plus

Baseline Phos Plus has a complete and balanced NPK analysis suitable for fertigation and foliar application with the addition of phosphonic acid suitable across a wide range of crops.

The analysis is perfect for plant establishment and maintained growth where an N : K ratio near 1 : 1 or a mid-season nutrient boost is required. The addition of phosphonic acid gives 125g of phosphonic acid per 1 L or 1.25 kg per 10 L application.

Benefits of Baseline Phos Plus

- Chelated trace elements for rapid plant uptake and to drive the NPK metabolism.
- Contains SLTEC's QuadSHOT® - The ingredients stimulate soil biological activity; improving the cycling and availability of plant nutrients, plant uptake efficiencies and soil fertility and health.
- Baseline Phos Plus has a high analysis compared to other liquid products and provides economic and efficient supply of nutrients and the capacity to reduce rates compared to common prilled complete fertilizers on the market.
- Efficiencies can be made with Baseline Phos Plus in fertigation applications by placing the nutrients at the root mass where they will be taken up by the plant; reducing loss or waste of nutrients.
