

FERTILIZERS

# 17.5% Calcium Addressing Deficiency in a Range of Crops

## Cal 1750™

Product Code: SNPK0051

### Benefits of Cal 1750

- Cal 1750 will assist in improving fruit calcium levels in pome and stone fruit and reduce the incidence of calcium-related disorders such as bitter pit, internal cork and lenticel blotch.
- Assists in the prevention of disorders such as tip burn in strawberries and blossom end rot in tomatoes.
- Softened and buffered to minimise phytotoxicity.
- Also contains a non-ionic surfactant for enhanced uptake.
- Suitable for foliar application and post-harvest dipping.
- Compatible with a wide range of agricultural chemicals and other SLTEC® fluid fertilizers. Contact SLTEC® for more information.
- Can be used to aid in the prevention of rain-induced fruit cracking in cherries.

Don't forget about boron (B), a micro nutrient that can be hard for trees to pick up, especially in drier soil environments. If boron is low it may enhance the effects of calcium related disorders.

SLTEC® Boron Complex offers 15% boron for foliar application.

### Guaranteed Analysis (w/v)

|                  |            |
|------------------|------------|
| Calcium (Ca)     | 17.5%      |
| Chlorine (Cl)    | 31.0%      |
| Specific Gravity | 1.367 kg/L |
| pH               | 7.0 - 9.0  |

### Typical Application Rates

#### Foliar:

3 to 12 L/ha

Horticulture use 200 to 2,000 L/ha water

Broadacre use at least 100 L/ha water
