

# Delivering Quality Produce

## Cal Mag & Boron<sup>TM</sup>

Product Code: GG0024

The N : Ca ratio of 1 : 1 is perfect for plant establishment and during rapid cell division phases or periods of stress where both growth and cell strength needs to be maintained.

Magnesium maintains plant colour as it is a key component of chlorophyll production.

Both magnesium and boron aid in the translocation of calcium to growing points. Boron is essential for the germination and viability of pollen.

### Benefits of Cal Mag & Boron

- Soluble nutrients provide hassle-free injection (no insoluble blockages) and rapid plant uptake
- High analysis provides for economic and efficient supply of nutrients and the capacity to reduce rates
- Maintains plant Ca : Mg ratios
- Boron to assist calcium mobility
- Improves plant cell wall strength and fruit firmness
- Chloride free

**Cal Mag & Boron can be blended with zinc, manganese, copper, iron and fulvic acid for enhanced uptake.**

Contact SLTEC<sup>®</sup> to discuss your specific nutritional requirements.

### Guaranteed Analysis

Nitrogen (N)	12.5%
N as NO <sub>3</sub>	12.5%
Calcium (Ca)	12.3%
Magnesium (Mg)	3.4%
Boron (B)	0.2%
Specific Gravity	1.483 kg/L
pH	2.0 - 2.5

### Typical Application Rates

#### General Foliar:

5 to 10 L/ha  
Horticulture use 200 to 2,000 L/ha water  
Broadacre use at least 100 L/ha water

#### Fertigation:

10 to 100 L/ha
