

A Multitrace Solution to Maximize Crop Potential

TE 8 PLUS

A foliar multi-trace element blend activated with Fulvic Acid (0.5%) to maximize uptake at lower rates than standard trace blends across a wide range of crops.

Benefits of TE 8 PLUS

- A focus on Magnesium, Manganese, Zinc and Copper – the key drivers of photosynthesis, healthy leaves & plants; resulting in reduced disease pressure.
- Additional Nitrogen to promote plant response and rapid plant uptake.
- Molybdenum and Boron to enhance assimilation and transport in the plant
- Fully soluble nutrients in plant available forms.
- Fulvic acid provides an efficient chelating agent with only very small amounts required to benefit plant permeability to a range of nutrients.
- TE 8 PLUS is physically compatible with a wide range of herbicides, insecticides and fungicides. Please contact SLTEC for more information.
- TE 8 PLUS will help ensure you utilise all your fertilizer inputs as the trace elements work in synergy with your Macro applications.

TE 8 PLUS is versatile across a range of crops from broadacre cereals and vegetables to pre-bloom and post harvest application in vineyards and orchards where it is often combined with SLTEC Nitro QUAD 3 or Lo Biuret Urea to improve bud nutrient levels to drive early spring growth.

Guaranteed Analysis

Nitrogen (N):	2.6%
Potassium (K):	0.1%
Sulphur (S):	4.2%
Magnesium (Mg):	2.4%
Manganese (Mn):	3.1%
Zinc (Zn):	3.1%
Copper (Cu):	0.47%
Molybdenum (Mo):	0.02%
Boron (B):	0.21%
Iron (Fe):	0.73%
Fulvic Acid:	0.5%
Specific Gravity:	1.30 kg/L
pH:	1.0 to 2.0

Typical Application Rates

Foliar

2 to 10 L/ha
Horticulture use 200 to 2,000 L/ha water
Broadacre use at least 100 L/ha water

Fertigation

10 to 25 L/ha
