

Sustainable Liquid Technology (SLTEC for short) is a firm all about liquid innovations for agribusiness.

If you can inject it or spray it, and pump it we're probably into it. Our core focus now and in the future involves the development and supply of Sustainable Liquid Fertilizer Technology to assist farmers achieve high performance productivity and quality outcomes, sustainably.

Liquid Fertilizers are widely regarded as one of the next major steps forward for Australian agriculture, providing controlled and highly targeted nutrient management. Particularly with the recent availability of multi nutrient liquid blends like SpringStart®, Green and Gro®, SprayNPK®, Sustain & Gro® and Turf & Landscape®. These products save time, reduce OH&S risks, taking crop nutrient management to a whole new level.

SLTEC has developed an innovative range of liquid fertilizer products to assist farmers efficiently and cost effectively provide the nutrients and soil fertility needs for sustainable crop growth.

Why purchase SLTEC fertilizer liquids over conventional methods of crop fertilizing?

- Our new custom blend liquid fertilizer facility in Northern Victoria along with 150 years team experience ensures you get the right product cost effectively at the right time
- SLTEC multi nutrient liquid products are tailored for specific crop and environmental requirements
- SLTEC liquid products are fully dissolved solutions (not suspensions)
- High quality blend ingredients are only ever used
- We can create a custom liquid blend to suit your specific crop, soil and environmental needs (minimum order of 5 T applies)
- Hydroponics & specialist custom blend services can be supplied
- 20L, 220L, 1000L & Bulk liquid fertilizer options are available
- Our bulk delivery truck system enables flexible on farm delivery options and quantities
- 48 Hour on farm delivery of selected blends is available
- Flexible farm storage options (1,500L, 2,400 L, 5,000 L, 10,000 L, 23,000 L and 32,000L custom fertigation tanks) are available
- Larger industrial storage & injection options available to suit corporate horticultural farms
- Fertigation injection & agronomic support is provided
- Our products are provided through our dedicated and professional dealer agronomist team

Our new world class liquid fertilizer formulations factory provides high quality and very efficient manufacture of liquid fertilizer products. Our on farm logistics, storage and injection systems are also available to help you achieve the most sustainable outcomes from our products.
